Dissecting a Strong edTPA Instruction Commentary: An Example Breakdown

Let?s analyze a hypothetical example, highlighting how each section integrates into a cohesive narrative.

Contextual Overview

"In this lesson, I taught a 5th-grade mathematics class focusing on multiplication strategies. The class comprises 25 students, including three English Language Learners and two students with Individualized Education Programs (IEPs). The classroom environment emphasizes collaborative learning, with students working in pairs or small groups. My goal was to help students understand multiple strategies for multiplication, fostering both conceptual understanding and procedural fluency."

Analysis: Here, the teacher provides a snapshot of the classroom context, including student diversity and classroom culture, setting the stage for their instructional decisions.

Learning Goals and Rationale

"The learning goal was for students to understand and apply different multiplication strategies, such as area models and distributive property, to solve problems efficiently. This aligns with grade-level standards (CCSS.MATH.CONTENT.5.OA.B.3). I selected these goals based on formative assessment data indicating that many students struggled with abstract multiplication procedures, and curriculum materials emphasizing conceptual understanding."

Analysis: Clear, standards-aligned goals are articulated, along with justification rooted in student data and curriculum priorities.

Planning and Instructional Strategies

"I planned a hands-on activity where students used grid paper to create area models, followed by a discussion of how this visual approach supports understanding of multiplication. I incorporated think-pair-share discussions and used visual aids to scaffold learning. I also prepared differentiated worksheets?some with visual supports for ELLs and simplified problems for students needing additional support."

Analysis: The teacher explains the instructional methods, rationale, and differentiation strategies, demonstrating purposeful planning based on student needs.

Assessment and Feedback

"Throughout the lesson, I used observational checklists and exit slips to gauge student understanding. I provided immediate feedback during pair work, prompting students to articulate their reasoning. The exit slips revealed that most students could now explain their multiplication strategies, guiding my planning for subsequent lessons."

Analysis: The commentary highlights formative assessment practices and how assessment data drove instructional adjustments.

Differentiation and Supports

"To support English Language Learners, I used visual aids and vocabulary charts. For students with IEPs, I provided step-by-step graphic organizers and allowed additional processing time. I also used flexible grouping to ensure peer support."

Analysis: Specific differentiation strategies are detailed, demonstrating an understanding of diverse learning needs.

Response to Student Needs

"During the lesson, I noticed some students appeared confused when transitioning from area models to abstract multiplication. I paused to re-explain using a different example and used concrete manipulatives to reinforce the concept. I also checked in individually with students who showed signs of misunderstanding."

Analysis: Reflection on real-time adaptation shows responsiveness and pedagogical flexibility.

Reflection and Future Planning

"This lesson reinforced the importance of using multiple representations to support conceptual understanding. Moving forward, I plan to incorporate more opportunities for students to explain their reasoning verbally and to scaffold abstract problems further for students who need additional support."

Analysis: The teacher reflects thoughtfully, linking lesson insights to future instructional plans.
